

Challenge

The University of East Anglia (UEA) sought a new building with green credentials that could serve as a centre for students wanting to go self-employed or start a business, the building had to reflect these ambitions and create a very low carbon footprint supporting innovative design & local materials. Therefore the installation of surveillance and access control devices must be efficient & strategically installed in keeping with The Enterprise Centre & UEA's goals.

Solution

The University of East Anglia elected Check Your Security to install 360 Vision Predator & Mobotix D25 cameras, providing a complete surveillance solution that integrates with the UEA's existing security setup. Assa Abloy locks seamlessly integrates into the existing Gallagher Access Control System that the UEA has invested in over the years, coupled with Gallagher T Series Readers allows the UEA the ability to easily & cost effectively increase Access Control doors. Gallagher T10 Card Readers & Internal Assa Abloy locks provide a fully flexible integrated building with multiple access control options. This solution is in keeping with the UEA's green environmental credentials.

Benefits

A fully scalable IP CCTV and Digital Access Control System, future proofed cabling and wider infrastructure, a fully integrated IP CCTV & Access Control System with multiple options.

- Lower operational costs
- Reduce internal investigation time
- Fully integrated system
- Fully scalable system
- Environmental credentials
- Easily Integrates with existing campus security setup

About University of East Anglia & The Enterprise Centre

The University of East Anglia (UEA) is an English public research university located in the city of Norwich. Established in 1963, the university comprises 4 faculties and 28 schools of study. Situated to the south-west of the city of Norwich, the university campus is approximately 320 acres (130 hectares) in size.

In 2012 the university was named the 10th best university in the world under 50 years old, and 3rd within the United Kingdom. In national league tables the university has most recently been ranked 18th in the UK by The Times and Sunday Times, 20th by The Guardian and 14th by The Complete University Guide. The university also ranked first for student satisfaction by the Times Higher Education magazine in 2013.

Features of the UEA campus include Earlham Hall, childhood home of Elizabeth Fry, which is now home to UEA Law School; the Sainsbury Centre for Visual Arts at the western end of the main teaching wall designed by Lord Foster to house the art collection of Sir Robert Sainsbury and Lady Lisa Sainsbury, it also features as the new avengers headquarters in Avengers: Age of Ultron, Ant Man and forthcoming Marvel Cinematic Universe films; and "Sportspark", a multi-sports facilities built in 2001 thanks to a £14.5 million grant from Sport England Lottery Fund.

The Enterprise Centre (TEC) is one of the UK's most sustainable buildings, a centre for student entrepreneurship, and a regional hub for innovators and businesses that are committed to a low carbon future. Built on a brownfield site at the University of East Anglia (UEA), TEC minimises greenhouse gas emissions at every stage of its life cycle. TEC was the first large commercial building in the UK to

target both Passivhaus Certification and BREEAM Outstanding, two of the most rigorous sustainable built environment standards.

“At Check Your Security we excel in providing digital solutions for large Universities and hospitals across the nation, working with the UEA's Enterprise Centre we were able to excel in providing a security installation in keeping with the buildings green aspirations, whilst not damaging the unique low carbon straw structure. We thrive working in challenging environments, we look forward to new and exciting opportunities in the future.”

Wayne Dyble, Service Director, Check Your Security

Thatching the Solar Roof

The Enterprise Centre has been realised as UEA and Norfolk's showcase low carbon building, and one of the UK's greenest commercial buildings. It is an inspirational example of the potential for sustainability-aware architecture and local, bio-renewable materials. A range of business tenants form a vibrant and successful green business hub, operating alongside teaching and learning space. The building is also an inspirational venue for meetings and events. Multi-award winning, the building has received a multitude of accolades. Current

total awards number eleven, was short-listed for a further four and is a finalist in a four more at the moment. Award highlights include the Guardian Sustainable Business Award, BREEAM Award and Architects Journal Reader's Choice.

Modern university living spaces must be efficient and well designed to serve students and staff for years to come, the UEA has invested wisely for the future ahead. Deciding to use Gallagher as the main access control solution has enabled the university to easily integrate new buildings into their existing setup, allowing for new doors to be added or old ones removed should the university desire. Check Your Security have been able to provide the UEA with a complete security solution in keeping with their environmental credentials and the existing campus. They have achieved this through providing energy efficient locks and state of the art IP based cameras that easily connect with the UEA's main control room that serves as a security hub for all security communications.

Looking ahead...

As the University of East Anglia continues to grow and develop as a leading UK university, Check Your Security will be able to deliver and develop new solutions for a safe, diverse digital future.
